Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-3, drawn to read/write circuit, classified in class 365, subclass 189.01.
 - II. Claims 4-5, drawn to read/write circuit, classified in class 365, subclass 189.01.
 - III. Claims 6-9, drawn to precharging, classified in class 365, subclass 203.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II/III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as write signal line and read signal line allocating crossing sense amplifier column, and write column selection line and said read column selecting line allocating in parallel to sense amplifier column (as in claim 1, lines 22-26). See MPEP § 806.05(d).
3. Inventions II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention III has separate utility such as a circuit to control start of a precharge operation of read signal line with precharge circuit after the operation of main amplifier is started. See MPEP § 806.05(d).
4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and field of search, restriction for examination purposes as indicated is proper.

Art Unit: 2824

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to VanThu Nguyen whose telephone number is (571) 272-1881. The examiner can normally be reached on Monday-Friday, 8:00am-4:30pm.
